- Operational Excellence
- Process Architecture
- Continuous Improvement
- Lean / Kaizen / Six Sigma
- Operating Models
- Performance Management & KPIs
- Business Process Reengineering
- Project Management
- Business Analysis

PROFESSIONAL EXPERIENCE

Sep 2022 - Present

MOL MAGYARORSZÁG -- MOL CAMPUS

Process Management Expert

BUILD Process catalog → **OPTIMIZE** Lean & Kaizen → **MEASURE** KPIs → **EVOLVE** Operating Model

- Built the MOL Campus E2E Process Catalog, initially covering 110+ operational processes across 23 service categories.
- Applied Lean and Kaizen principles to streamline and standardize the process landscape, consolidating 110+ operational processes into approximately 75 standardized E2E processes.
- Designed E2E operating processes across the Campus service ecosystem, including digital services, Incident and Major Incident Management, E2E Development and Order-to-Cash.
- Developed a Campus-wide performance management framework with 160+ KPIs and a Power BI management dashboard, enabling transparent and comparable service performance.
- Led operating model improvements focused on Service Ownership, Service Reviews, accountability and cross-functional collaboration.

Apr 2019 - Sep 2022

VODAFONE

Senior Process Development & Improvement Expert

- Led E2E process analysis and improvement initiatives across Finance, Controlling and Logistics, including asset lifecycle processes.
- Assessed financial and logistics processes to identify automation and digitalization opportunities and improve operational efficiency.
- Identified the need for a reporting system upgrade through process optimization and subsequently managed its implementation as Project Manager.
- Coached six Six Sigma improvement projects and delivered methodology training, supporting teams in structured problem-solving and continuous improvement.

PROFESSIONAL EXPERIENCE (continued)

Apr 2018 - Feb 2019

ELMŰ-ÉMÁSZ
Business Process Regulatory Expert

- Analyzed and improved customer service processes across Call Center, Back Office and Debt Collection operations using Lean and Kaizen methodologies.
- Represented Customer Service in the implementation of a ServiceNow-based knowledge management solution, working with IT and external vendors on requirements, workflow design and business continuity.
- Improved Call Center operations through call coverage and workforce skill analysis, supporting better resource allocation and service availability.
- Conducted internal process audits across Call Center, Back Office and Debt Collection, identifying improvement and compliance opportunities.

Sep 2012 - Dec 2017

MAGYAR TELEKOM (Telekom HU)
Business Process and Project Manager

- Led the transformation of the Customer Service knowledge management ecosystem (Magic Book), combining process redesign with technology change and introducing automated content review and update cycles.
- Led the Customer Service workstream for the launch of mobile device insurance service, covering business analysis, E2E process design, regulatory alignment, testing and go-live.
- Led a Six Sigma Green Belt process optimization project that reduced operational reports by 50% and identified several thousand euros in potential cost savings.
- Conducted Business Process Reengineering across Back Office operations, assessing compliance and implementing process improvements.
- Prepared executive decision-support materials and presentations for senior and middle management across strategic initiatives, product launches, workshops and town halls; trained colleagues in effective business presentation development.

Apr 2007 - Aug 2011

Call Center Expert

- Provided professional and operational support within the Call Center, including regulatory reviews and knowledge management activities.
- Guided colleagues and contributed to the development of internal digital information solutions.
